NOTE: Unless fitting with a Scorpion GPF-Back system you will need to cut the original exhaust to install this product.

Instructions for fitting to JCW System

Remove entire Cat-back system from the car, MINI put a dimple in the pipe which is the factory cut point, we have used the same point for our system. Make a cut on the dimple shown in the photos.

Once cut has been made, clean and debur the end of the pipe as the Scorpion GPF Delete goes over this.

Install the Scorpion GPF Delete to the car and secure with OE Clamps in its original position.

Re-install the OE GPF-Back exhaust system using the supplied adaptor.
